## **DETAILED ACTION**

### ***Election/Restrictions***

Claims 7-10, 12, and 13 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on May 26, 2004. Examiner further withdraws Claims 5 and 6 for being drawn to the nonelected species of Figure 3.

### ***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the base section, chamber port, and means for generating damping force must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for

Art Unit: 3763

consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Objections***

Claims 1 and 3 are objected to because of the following informalities: It is unclear in Claim 1, what Applicant is positively reciting in Lines 6-8 ("...by which drive force said driven member is displaced..."). Claim 3 is unclear since there is no disclosure of "a chamber port for a medium flowing into said chamber." Appropriate correction is required.

### ***Specification***

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: There is nowhere in the disclosure any mention of "means for generating a damping force," and "at least one chamber port".

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 3, 4, and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Castellano et al (US 5,536,249), Knauer (US 5,514,097), Haber et al (US 5,320,609), and Rex et al (US 4,592,745). Castellano et al, Knauer, Haber et al, and Rex et al all disclose a device for administering an injectable product comprising a base section, a container arranged in the base section from which container a product dose is dispensed through a needle, and a drive unit (Figures 5-8; Figures 2-6; Figures 2-3; Figures 3, 10 respectively). Due to the numerous unclarities with the claims and the specification, Examiner interprets the claim language as best as she can.
